

TD191

LTE USB Dongle

Secure and reliable 4G internet connection to keep your business moving forward.

If you have a data Nano SIM card, then you have secure, reliable internet with the JACS' TD191, LTE Dongle. Just insert the Nano SIM card of your choice into the dongle, plug the dongle into the device you'd like to receive internet connection, and await your high-speed internet. Suitable for laptops, hotspot routers, and any device with a USB port that needs mobile cellular network access, the TD191 is perfect for businesses looking to upgrade existing equipment to 4G without expensive equipment upgrade costs. The TD191 is simple to use and in most cases features driverless installation. The sleek, modern design lets you easily access the internet anywhere with global roaming in North America, EU, and China, from a device compact enough to slide into your pocket.

CERTIFIED

AT&T*, AT&T FirstNet*; FCC, CE, PTCRB, GCF, SRRC/CCC/CTA (China); NCC (Taiwan); IC (Canada)

GLOBAL CONNECTION
