

# CUSTOM DISTANCE LEARNING SOLUTIONS

## COMBINED SO YOU CAN DO MORE

The JACS Solutions and Asavie partnership makes it easy for schools and integrators to provide their students with the tools they need for effective education in the comfort and safety of their homes. Whether that be a tool for connectivity, like JACS' USB dongle, or a fully customizable tablet solution like JACS TT800Q 4G LTE tablet. The device of your choice can now be bundled with Asavie's incredible network-level device security. Unbeatable hardware meets unmatched protection, the rest is up to you.

## DISTANCE LEARNING TOOLS

### TD191 4G LTE USB DONGLE

The JACS' TD191 4G LTE USB Dongle is the answer to your students' connectivity issues. Just insert your Nano SIM card, and your students will have secure, reliable Internet at up to 4G LTE speeds. This plug n' play dongle features driverless installation suitable for a wide array of devices that your students use like chromebooks, laptops, desktops, hotspot routers, or any device with a USB port that needs instant connectivity. The TD191 is compact and easy-to-manage while also provides extended SD card storage to hold more assignments, videos, music, images, and more.

### TT800Q 4G LTE TABLET

The TT800Q 4G LTE tablet combines the security and flexibility you need into a cost-effective and powerful education solution. Sleek design meets superior functionality in the TT800Q making it the perfect tablet for schools and integrators looking to create a robust, sole-purposed, distance learning solution. This tablet allows you to customize its firmware to include the learning applications of your choice on a tamper-proof interface for added security and control of students' privacy. The TT800Q is also certified on AT&T's reliable network so your students always have the connectivity they need.

Contact us for specific product data sheets for more details and specifications.

**If you can dream it, we can make it**

# ASAVIE ACCESSMYLAN

Asavie's AccessMyLan is a mobility solution for schools that provides management and security of all data and mobile devices. The solution is fully compliant with the Children's Internet Protection Act (CIPA) to ensure students and their families are protected from harmful content online. The AccessMyLan solution is ready to be leveraged with JACS' TD191 and TT800Q devices to give teachers the control they need to create a safe distance learning environment for their students.

## CIPA COMPLIANT & SECURE

Network-level protection against harmful websites, malware, phishing, and man-in-the-middle attacks.

## CONTROL

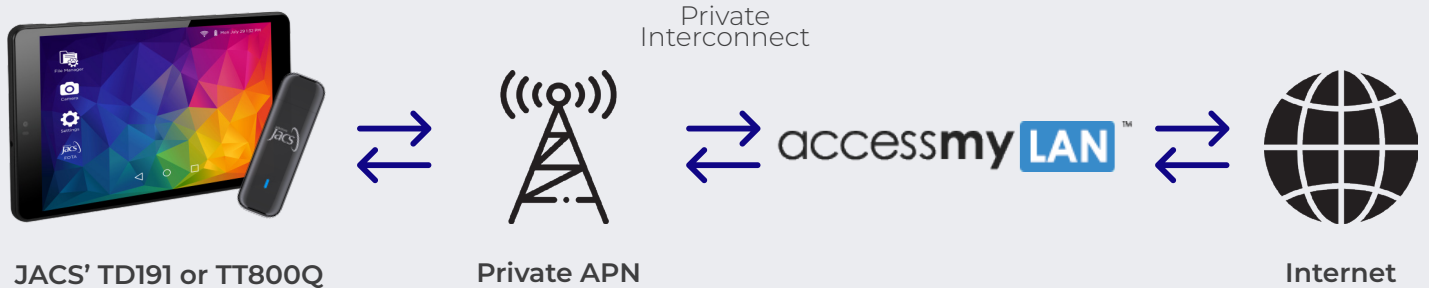

Complete visibility of all Internet traffic on both cellular and Wi-Fi networks with robust reporting.

## PRODUCTIVITY

Limit student access to just the content and apps you want while blocking out all the rest, limiting potential dangers and distractions.

## HOW IT WORKS

## PARTNERING FOR SUCCESS

### COLLABORATION

We listen carefully to our customers, and design just the exact set of features and capabilities you need.

### LONG LIFE CYCLE

We apply best practices to our product development and supply chain management to ensure your products will last.

### COST-EFFECTIVE

We provide quality products with the latest technologies at a cost that fits your business's budget.

### ASAVIE ACCESSMYLAN

Management and security of all data across your JACS devices for a robust, secure solution.

### PURPOSE-BUILT

Our firmware and hardware customization services transform our standard devices into purpose-built solutions.

### UNMATCHED SECURITY

Locked down firmware includes just the necessary applications and removes vulnerabilities.
