

JACS SOLUTIONS

CUSTOM SOLUTIONS FOR TELEHEALTH

From remote patient monitoring to virtual visits, there has been a spike in both the importance and usage of telehealth solutions. Telehealth allows doctors to continually monitor patients with chronic conditions, manage prescriptions, virtually check up on patients, and more, all while keeping patients safe in their homes and healthcare professionals safe in their offices. Whatever your telehealth needs, JACS' solutions are guaranteed to be secure, cost-effective, and powerful to help you bring your vision to life.

INSTANT, RELIABLE, 4G INTERNET FOR PHYSICIANS & PATIENTS

Whether your patients keep you on the go or you want to give your patients Internet access for critical healthcare tools, [JACS' TD191 4G LTE USB Dongle](#) provides a secure, easy-to-use, and reliable way to receive instant connectivity wherever it's needed. Needing only the Nano-SIM card, the TD191 works across multiple bands for cellular connectivity at 2G, 3G, and 4G LTE speeds. Compact as it is affordable, these plug-n-play dongles are the perfect tool to disseminate across practices, patients, or wherever Internet connectivity is needed to treat patients and save lives.

TD191 4G LTE USB DONGLE

HIPAA COMPLIANT

JACS offers the firmware security you need to lockdown devices to protect PHI and achieve HIPAA compliance. We also partner with [Asavie](#), to offer greater network level security.

4G LTE SPEEDS

Spend more time treating patients and less time buffering with fast, reliable Internet at up to 4G LTE speeds.

COMPACT

Forget bulky, hard-to-manage equipment. You deserve the tool that is as powerful as it is compact for ease-of-use and improved manageability.

MULTI-DEVICE COMPATIBILITY

Leverage this dongle on the tools you and your patients use most including Chromebooks, laptops, desktops, hotspot routers, and more.

DRIVERLESS INSTALLATION

Just plug the dongle into the device USB port for instant Internet access on ChromeOS, Windows, JACS' Android devices, and Linux.

EXTENDED STORAGE

Never run out of the space you need to help patients. Each dongle has a built-in SD Card reader to hold more documents, videos, audio, images, and more.

POWERFUL TABLET, ENDLESS POSSIBILITIES

JACS' TT800Q is the perfect tablet for service providers looking to create a robust, sole-purposed, telehealth solution. With endless possibilities, the TT800Q allows you to customize the firmware to include the healthcare applications of your choice on a tamper-proof interface for added security and control of PHI and patient privacy. The TT800Q is feature-rich to help you build a total solution and certified on AT&T's reliable 4G LTE network to ensure you have the connectivity you need.

TT800Q 4G LTE TABLET

HIPAA COMPLIANT

JACS offers the firmware security you need to lockdown devices to protect PHI and achieve HIPAA compliance. We also partner with [Asavie](#), to offer greater network level security.

OTG-ENABLED & PERIPHERAL READY

Easily connect multiple devices including keyboards, mice, printers, and more for a complete telehealth solution.

4G LTE SPEEDS

Spend more time treating patients and less time buffering with fast, reliable Internet at up to 4G LTE speeds.

ADDITIONAL ACCESSORIES

Protect against all of life's bumps and drops with optional enclosures, screen protectors, and cases.

COMMERCIAL-GRADE

More durable than consumer-grade, off-the-shelf tablets, with a longer device lifecycle for lower TCO of your investment.

CUSTOMIZABLE

Add all the applications you need and nothing you don't. Further customization of wallpapers, launcher, hardware, and more available.

STORE. SECURE. STERILIZE.

Extra protection for both your investment, staff, and patients. [JACS' Charging Carts](#) allow you to quickly charge a number of different devices including tablets, laptops, Chromebooks, smartphones, Internet devices, and more, while securing them behind steel-constructed, mechanical anti-theft doors. Built-in UV sterilization delivers an effective, affordable disinfection method that eliminates harmful bacteria and viruses without introducing harmful chemicals to your staff or patients.

CHARGING CARTS

UV STERILIZATION

Peace-of-mind for physicians, staff, and patients with chemical-free, no-hassle, cost-effective sterilization.

HIGHLY SECURE

Built-in physical security includes cold-rolled steel construction, fire-resistant separators, and anti-theft doors.

COMPATIBLE

Compatible with a number of devices including laptops, tablets, smartphones, handsets, and more.

COMPREHENSIVE PROTECTION

Smart Fan Management regulates internal temperature. Charging Carts are equipped with electrical safety features to prevent voltage overloads.
